PROJECTS

SimpleStore
https://github.com/olek1305/SimpleStore
June 2023,

SimpleStore is my first Laravel project
Framework: Laravel, Bootstrap

Laravel-qa
https://github.com/olek1305/laravel-qa
January 2024

I completed the Laravel-QA project on Udemy, adapting the code to newer Laravel versions. This enhanced my understanding and improved my problem-solving skills in dynamic development environments
Framework: Laravel, VueJs, Bootstrap

larazillow
https://github.com/olek1305/larazillow
February 2024

The goal is to insert offers to sell an apartment, look at photos and determine how much to offer
Framework: Laravel, VueJs, Tailwind, Inertia.js, Ziggy. Tool: Docker

AbexGuilds
https://github.com/olek1305/AbexGuilds
April 2024

The project is only for the game AFK Arena. You can manage not only one guild, but also multiple guilds, add people to the list with injury records on abex from multiple seasons, notebooks, transfers to another guild. Can check stats (count users, notes, kick, ban, Guild dmg totals depend on the season) Activity is like class register, you mark these players whether they have farmed on the day or completed the farm, so that you do not leave out these players.
Framework: Laravel, VueJs, Tailwind, Inertia.js, Ziggy

Freshly-Ecomerce
https://github.com/olek1305/Freshly-Ecommerce
August 2024

Large project shop, E-Commerce, like Amazon
Framework: Laravel, Bootstrap, YajraBox. Tool: Docker

Rezervo
https://github.com/olek1305/Rezervo
January 2025

The project is based on this booking system relating to private doctors. An idea from a student who asked me to add anything, and addition we used with git merge/git pull (branch UI and main), It has 2 translations into Polish and English, Responsive, dark mode & light mode, tests Pest. There are 3 ranks (user, doctor and administrator)
Framework: Laravel, VueJs, Tailwind, Inertia.js. Tool: Docker, Redis, Pest
